

# GROUPE BONNEFON

---

Your expert partners for  
welding and extraction solutions

The GROUPE BONNEFON GROUP is constantly innovating to assert its differences and independence.

Our aim is to be a technical expert and ensure a proximity to customers. We believe human contact is the key to meet all the new industrial challenges.

## GROUPE BONNEFON's history

### E<sup>TS</sup> J. BONNEFON

Jacques BONNEFON founded the BONNEFON company then specialized in welding and cutting solutions for industrial firms.

### BONNEFON soudure

Gérard and Daniel BONNEFON take over the management of the company which becomes BONNEFON SAS.

### GROUPE BONNEFON

Ceation of the holding GROUPE BONNEFON.

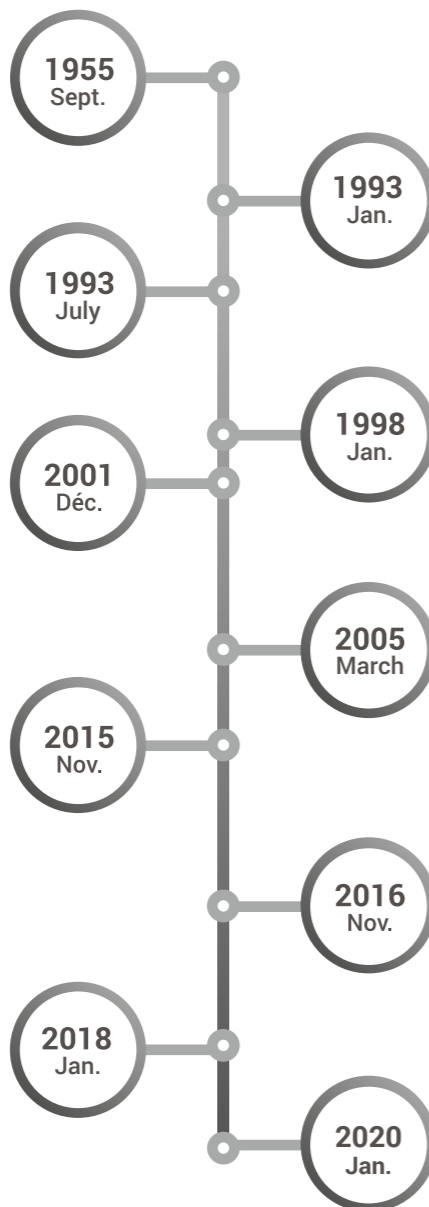

### BONNEFON SOUDURE BONNEFON INDUSTRIES

BONNEFON SAS evolves and is divided into two commercial brands:

- BONNEFON SOUDURE, which will retain its historical business of regional distribution/trading of welding, cutting and fume extraction systems and supplies,
- BONNEFON INDUSTRIES becoming the national importer of the two German brands DINSE and j.thielmann.

### GROUPE BONNEFON

Change of governance. Following the retirement of his brother Gérard, Daniel BONNEFON takes over alone the management of the GROUPE BONNEFON.

### | Partnership

BONNEFON company becomes the exclusive importer of DINSE products in France and expands from a regional to a national business.

### | Partnership

Beginning of the partnership with J. THIELMANN. The j.thielmann products completed the DINSE offer.

### 

ENGMAR SAS, specialized in welding fume extraction and treatment solutions since 1993, joins the GROUPE BONNEFON.

### 

Acquisition of Torche Service marking a new stage in the GROUPE BONNEFON's growth. Torche Service is then renamed TORCHES SOLUTIONS and continued to operate within the Group.

### GROUPE BONNEFON

Relocation of GROUPE BONNEFON in brand new buildings in Bouguenais.

Today, the GROUPE BONNEFON GROUP is hosting several companies and brands:

**BONNEFON LOGISTIQUE SAS** : the holding of the Group, owning BONNEFON SAS, ENGMAR SAS and TORCHES SOLUTIONS SAS. All headquarters are based in Nantes.

**BONNEFON SAS** based in Nantes (France), gathering both BONNEFON SOUDURE and BONNEFON INDUSTRIES brands.

Both of the businesses activities BONNEFON SOUDURE and BONNEFON INDUSTRIES are based in Nantes (44).

**ENGMAR**'s business activity is based in Saint-Romain de Popey (France) near Lyon (69).

**TORCHES SOLUTIONS** is based in Stering-Wendel (France) near Forbach (57).

The GROUPE BONNEFON has won the trust of some of the world's leading brands, both partners and customers, and is now able to offer a full range of solutions and expert services dedicated to welding and welding fume extraction. A strategic choice of specialization made very early on, making the GROUPE BONNEFON a key player not only in its historic regional territory, but also throughout France and now internationally.

**In the future**, the GROUPE BONNEFON will continue to cultivate its family heritage through a mastered development, always focused on customer services and solutions, as well as respect for the individual and the environment.

The GROUPE BONNEFON continues to enhance its offer, associated services and its capacity for innovation in the fields of manual handling, mechanization, cobotics and robotics.

The diversity and the quality of products and services of a company specialized in systems and supplies for welding and cutting.

The label of the BONNEFON GROUP dedicated to services and technical solutions for welding.

Within the GROUPE BONNEFON, the BONNEFON SOUDURE brand is distributing systems and supplies for welding. BONNEFON SOUDURE assists welding professionals regionally, on the West area of France.

BONNEFON SOUDURE proposes solutions for management, repairing and optimization of the customers' welding machine park and therefore allows best work practices and the perfect protection of welders.

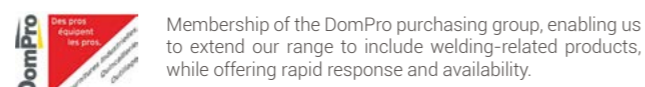

We continuously expand our offer with new products and brands that best suits our customers' needs.

Our welding product range is well-known in the welding filed:

- Welding and cutting machines and torches for all welding manual, automatic and robotic methods.
- Filler materials

...And we also offer welding-related products:

- Abrasives and blasting
- Equipment and accessories
- Personal Protection Equipment (PPE)
- Welding fume extraction solutions

Not only do we deliver quickly to our customers' premises, but our in-stock products are also directly available in our store and on display in our showroom.

With its technical expertise, BONNEFON INDUSTRIES advises its customers in France on the solutions that are adapted to their precise needs concerning manual, robot and automatic welding.

Thanks to its partners, BONNEFON INDUSTRIES offers complete range of solutions for MIG / MAG, TIG, Plasma and Laser welding.

BONNEFON INDUSTRIES is the exclusive importer of both DINSE and j.thielmann brands in France.

DINSE is a German manufacturer widely recognized for its expertise in the manufacturing of welding torches, wire feeders as well as manual and robotic welding machines.

Since 1979, j.thielmann has manufactured torch cleaning stations for robotic MIG / MAG and hybrid welding.

The DINSE and j.thielmann products are used in all industrial sectors, such as aircraft manufacturing, automotive industry, railway construction and shipbuilding industry.

## OUR SERVICES

The aim of the GROUPE BONNEFON is to provide not only high quality products but also associated services.

## ASSOCIATED EXPERTS

Our sense of service makes us a **true technical welding partner** to assists customers on the solutions that best suits their needs.

Technical support  
Tests/innovations and applications  
in our technical lab (TechLab)

Maintenance & after-sales service  
for welding machines and torches

Calibration & validation

Retrofit / trials

Renting

Supply chain

TORCHES SOLUTIONS is a major player in engineering and services for welding and cutting torches.

Engmar is specialized in design and development of welding fume extraction solutions in France and internationally.

TORCHES SOLUTIONS leverages its 30 years of manufacturing and repairing expertise in welding and cutting torches for all welding methods and for all brands. With its technical expertise, TORCHES SOLUTIONS offers standard solutions but also tailor-made solutions made in France.

## Solutions for all welding methods

TORCHES SOLUTIONS provides welding solutions adapted to your needs:

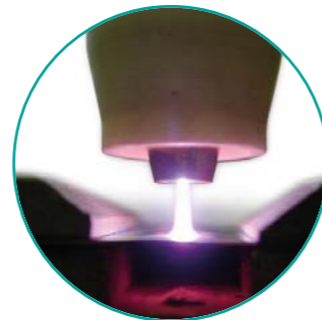

MIG

TIG

Robotic

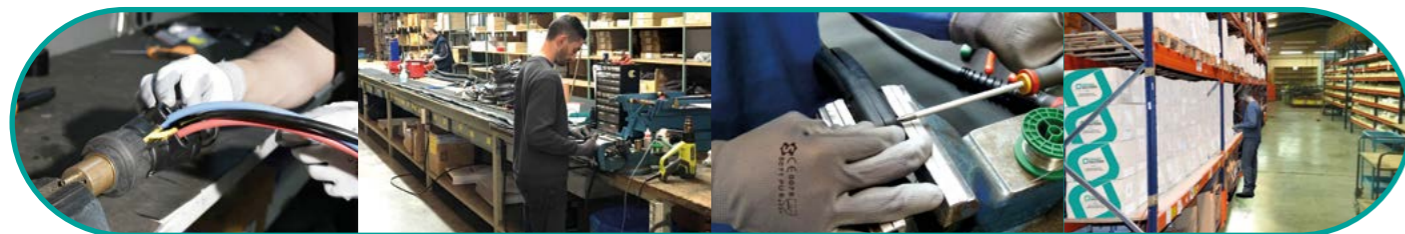

Plasma - Laser

- A full range of TIG and MIG torches and consumables: new TSMIG & TSTIG ranges
- The entire DINSE range in robotic welding
- A wide choice of Plasma and Laser equipment
- Spare parts and consumables for all welding methods and for all brands

## Our associated services

**Technical support / retrofit**

**Standard & tailor-made manufacturing**

**After-sales service & repairing / maintenance**  
All brands

**Supply chain & stock management**  
Availability and prompt response

## STANDARD SOLUTIONS

### Extraction welding torches:

The ENGMAR welding torches with integrated extraction provide efficient welding fume capturing at the source for most MIG/ MAG and TIG processes.

### Extraction slit nozzles:

Combined with a high-vacuum extraction unit, extraction slit nozzles not only allow extraction of welding fumes for all welding methods, but also for related applications (milling, etc.).

### Extraction units:

The ENGMAR high-vacuum extraction units allow the connection of extraction welding torches or extraction slit nozzles, thus enabling a flexible arrangement of the workstations.

### Fume extraction tables:

The fume extraction tables of ENGMAR for grinding, welding or cutting purposes ensure efficient fume extraction within the workstation level.

### Jib cranes and swing arms:

Jib cranes and swing arms allow the suspension of the welding torch and beams improving the ergonomics of the different types of workstations.

With its **integrated engineering office (engineering, R&D, project management) and production unit**, ENGMAR certifies made in France solutions.

## TAILOR-MADE SOLUTIONS

### Ductworks:

General ventilation and air extraction or introduction systems.

The full engineering study includes:

- Local extraction devices
- General ventilation system
- Compensation of extracted air
- Treatment and transport of polluted air

### Robots:

Integration of solutions for welding fume extraction from robotic cell.

The solutions of ENGMAR are broadly recognized by the main manufacturers and integrators of welding robots, with whom ENGMAR has been collaborating closely for several years.

### Central extraction units:

Custom centralized systems permitting the connection of several extraction welding torches.

The central extraction units of ENGMAR allow the treatment of air pollutants for entire manufacturing plants using extraction welding torches, slit nozzles or others.

## SERVICES

Engmar also offers associated services, such as the installation of its solutions, employee training and a torch maintenance service and facilities thus guaranteeing its customers the sustainability of their investment.
